MTAC 138

07.16.2014

Agenda

Reference Material: EIN_MTAC138_2014_07_16.pptx

- **Roll Call + Review Minutes from Previous Meeting**
- **eInduction Status**
- **Onboarding and Adoption**
- **IM-DAS Solution Update**
- **eInduction Application Update**
- **eInduction Known Report Issues**
- **Invoicing**
- **Action Items**
- **Questions**

Attendees

- | | | |
|-------------------------|---------------------|------------------|
| ▪ Anne Skroch | ▪ Janine Sarli | ▪ Nancy Garrison |
| ▪ Anthony Frost | ▪ Joe Bailey | ▪ Peter A |
| ▪ Beth Lavati | ▪ Kurt Hoffman | ▪ Rich |
| ▪ Call-In Users = 10 | ▪ Kurt Ruppel | ▪ Robert Dorre |
| ▪ Carlos Cruz | ▪ Linda Gustason | ▪ Tom Glassman |
| ▪ Danielle Aleman Rojas | ▪ Michael Patterson | ▪ Tony Cheever |
| ▪ Guest | ▪ Michael Smith | |
| ▪ James W | ▪ Monica Lundquist | |

Notes

Roll Call + Review Minutes from Previous Meeting

eInduction Status

- **Process Compliance Issues**
 - **Q:** What documentation would be applicable to appeal a duplicate scan error?
 - **A:** USPS will review and provide at a later date in conjunction with other invoicing dispute criteria

Roll Call + Review Minutes from Previous Meeting

- No comments or concerns from industry regarding close out items

eInduction Status

- No comments or concerns from the industry

Onboarding and Adoption

- No comments or concerns from the industry

IM-DAS Solution Update

- Additional end-to-end testing of IM-DAS scanner will be performed in August once USPS Engineering deploys scanner system changes
- Industry asked for explanation of how IM-DAS solution will work:
 - IM-DAS is a non-wireless scanner that, after system updates, will collect the container scans and appointment information
 - Once the device is cradled, information will be uploaded to *PostalOne!* for post-induction processing
 - Industry should refer to the materials from the MTAC 138 Face-to-Face meeting on May 22
- **Q:** Will SV sites begin to use the IM-DAS solution?

- **A:** No, SV sites will continue to use their existing hardware and process with the long-term goal of all sites moving to post-induction processing
- **Q:** What happens if there is a container problem and the container has already been released?
 - **A:** As discussed during face-to-face meeting, all validations will be performed post-induction – the clerk will not get feedback from the device
- **Q:** If no content available in FAST will it error out?
 - **A:** USPS will confirm functionality with FAST

eInduction Application Update

- **Q:** Is requiring the CRID on the eInduction filter just for the non-SV pilot?
 - **A:** No, this is the current process in production
 - CRIDs must be activated for eInduction because mailers are flagging containers for EIN, but not participating leading to errors on the dock
 - The filter may be retired once 50-60% of volume is eInduction, as the filter is not intended to be a long-term portion of the program
- **Q:** Based on the new ORIGIN functionality, if I [mailer] input ORIGIN will I no longer get mis-shipped error?
 - **A:** Correct, but USPS encourages the use of the locale key whenever possible

eInduction Known Report Issues

- No comments or concerns from the industry

Invoicing

- No comments or concerns from the industry

Action Items

- A webinar is in development for all eInduction reports and will tentatively available in late August 2014
- **Q:** Will AV (appointment validation) error go away once IM-DAS solution is rolled out?
 - **A:** Yes, it will go away once non-SV solution deployed
- Discussion: Date Range search for Shipping Summary Report desired feature?
 - **A:** From industry: yes, absolutely
 - **AXN:** Add to future release enhancement

Questions

- **Q:** What is the target IM-DAS rollout date?
 - **A:** Begin pilot in September 2014
- **Q:** Due to network consolidation, will files indicating sites as SV or non-SV be modified?
 - **A:** USPS will continue to provide a list of SV sites until the non-SV process is rolled out

Meeting Summary and Major Outcomes

- Identified that there is limited industry understanding of new non-SV process

Action Items

<i>Date Created</i>	<i>Action Item</i>	<i>Task Owner</i>
7.16	For non-SV solution: Confirm if there is no content available in FAST if an error will occur	USPS
7.16	Work with IT Teams to develop date range functionality for Shipping Summary Report	USPS
7.16	Provide updated SV site list based on network consolidation	USPS
